

OpenERP Thunderbird plug-in Installation Guide

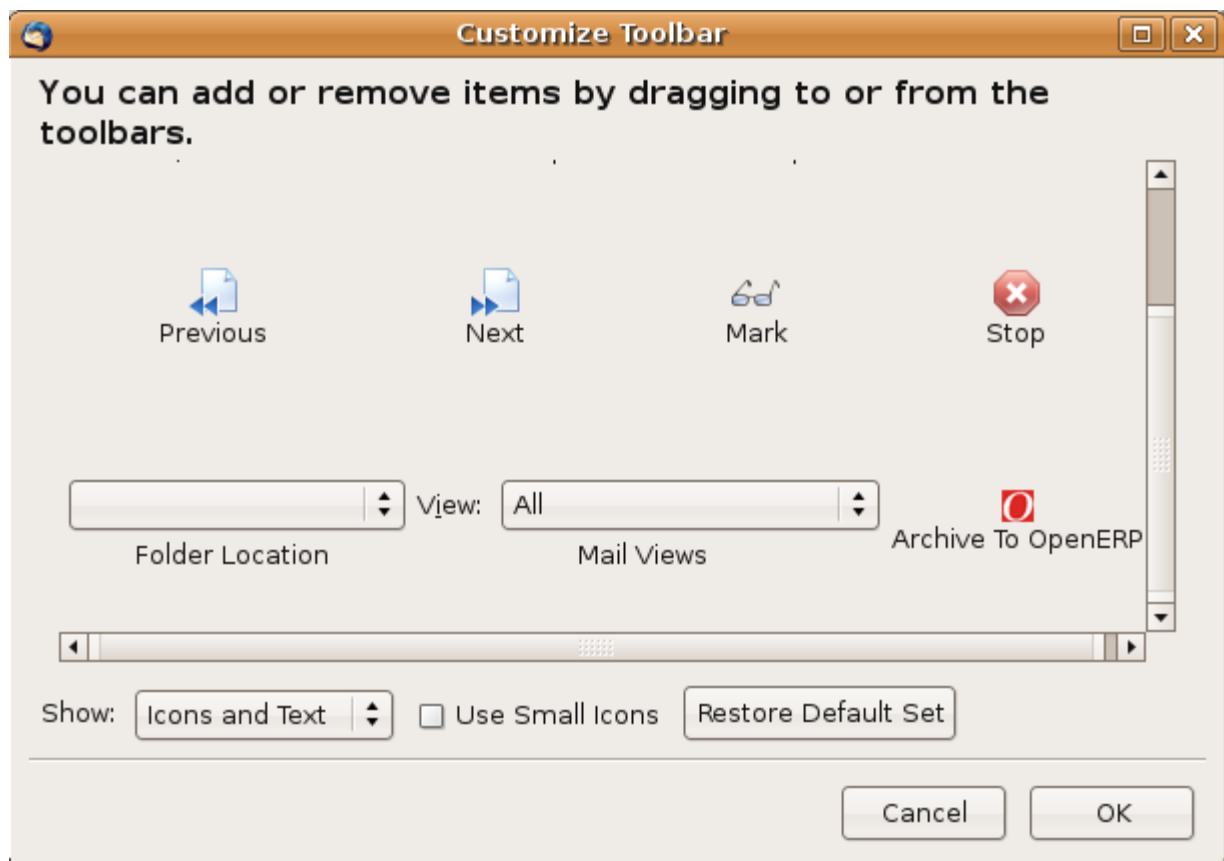

INTRODUCTION:

The thunderbird plug-in supports the file with extension (.xpi). The thunderbird plug-in will also be a (.xpi) file.

How to install thunderbird plug-in ?

1. From Menu Bar, Open Tools -> Add ons.
2. Now click on install button and a browser window will appear.
3. Just select the (.xpi) file from thunderbird/plugin directory and click ok, a new software installation window will appear and within a short time "Install Now" button will be enabled.
4. Click on "Install Now" and restart Thunderbird.
5. Now Thunderbird plug-in is installed.

How to set the plug-in icon “Archive to OpenERP” on the tab panel ?

Right click on the tab panel and click on “Customize” and a customize toolbar window will appear.

1. Now Drag-n-Drop the “Archive To OpenERP” icon on the toolbar and click ok.
2. Now the Thunderbird plug-in is fully installed.

Enjoy Archiving your Thunderbird E-mails to OpenERP.
